EVALENE® HDPE PP LLDPE PRODUCT DATA SHEET

Linear Low Density Polyethylene

LF20186

EVALENE® LF20186 is a high slip, high antiblock Linear Low Density Polyethylene grade with butene (C4) as comonomer for blown film applications.

EVALENE® LF20186 is tailored for thin to medium thickness films (25 to 50 microns; 0.001" to 0.002"). It is especially designed to work well when blended with low density polyethylene (LDPE). It is likewise suitable as lamination layer or core layer material in coextruded films. Films made with **EVALENE® LF20186** are notable for their toughness, flexibility and clarity - a good combination of mechanical and optical properties.
